

# The simplest diagnostic tool is most probably one you don't have!

Have you ever completed an easy endodontic access only to find the buccal or mesio buccal canals obliterated? Or perhaps there is an extra canal that will go undetected! Eliminate "hunting" for these canals and the lingering risk of perforation by positively locating endodontic orifices with a *TransCure* Transilluminator.

Have patients refused recall x-rays because of their health concerns? When this happens everybody loses. The patient, since decay may not be diagnosed ... the doctor, who knows the problems which may occur and then must argue for the diagnostic information necessary ... and also the practice, in loss of revenue. Diagnose caries in anterior and posterior teeth without x-rays and nicely demonstrate your concern for your patient's health with a *TransCure* Transilluminator.

Hairline crown fractures which cause pain, but are undetectable until crown failure occurs, are an embarrassing problem. This is especially true if the fracture line is in a porcelain or a porcelain fused to metal restoration. The *TransCure* Transilluminator can locate problems before the patient does!

## TRANS CURE

**Special Price**  
**\$249**

- \* Low Battery Indicator
- \* Optional Spare Battery
- \* Easily Stores Anywhere
- \* Wall Recharging System

- \* Super Cells Last for Months
- \* Plug-in Probe for Light Curing

# Here's another instrument we're sure you don't have ... sealant curing!

Your hygienist probably sees more patients than anyone else in your office other than the receptionist. And we all know that hygiene work is extremely profitable. Especially when you consider the placement of sealants. This procedure alone can significantly enhance the bottom line.

So why should your hygienist always be searching for the light curing unit? And suppose you are using it for all your restorative work? The *TransCure* sealant curing unit was specifically designed for the hygienist ... so they can function comfortably and very economically ... in their own space!
